

How can your organisation benefit from Re:fit?

Re:fit benefits

- competitively tendered Official Journal of the European Union (OJEU) advertised framework developed to suit the needs of public sector organisations
- ability for fast and efficient tendering
- reduced procurement times and costs by using pre-selected framework providers
- availability of support to public sector users throughout the procurement process from the Re:fit support teams to drive the quality of tenders
- tried and tested approach
- guaranteed return on investment
- “spend-to-save” scheme – generating energy savings and tackling failing building infrastructure without diverting spend

Re:fit benefits

- potential to use a range of financing options for projects to enable higher capital investment and maximise benefits for public sector organisations
- clear pricing and contract terms to reduce the time between service provider selection and contracting
- flexible payback periods
- centrally-managed framework to enable coordination of activities
- potential to capture economies of scale through collaborative procurement
- wide range of energy projects covered

Re:fit is –

a procurement initiative for public sector organisations wishing to implement energy-efficiency and local energy-generation measures across their premises and support services. These measures improve the energy performance of buildings, thereby reducing carbon emissions and achieving substantial guaranteed annual cost savings. In addition, it can offer significant income generation opportunities through the introduction of energy-generation measures.

The programme helps by enabling a range of public sector organisations, including local authorities, government departments, schools, universities, NHS, leisure centres and museums, to implement retrofit projects and achieve large financial savings through two principal means:

a framework of 16 pre-qualified providers

expert teams that provide the end-to-end support required to get projects started and successfully implemented

National quotes

“Local Partnerships’ professional support helped Buckinghamshire County Council through the project’s internal approval stages to deliver a tailored approach. It provided technical expertise to review the differing approaches offered for energy reduction, to select the most appropriate service provider for the Council.”

Rachel Toresen-Owuor, Energy Manager,
Buckinghamshire County Council

“Local Partnerships gave us confidence... by guiding us through the Re:fit procurement process, offering professional support and advice and asking challenging questions about issues we hadn’t even thought about. Without their support, the procurement process could have been a lot more stressful and we may not have achieved the goals.”

Sheryl French, Project Director, Mobilising Local Energy Investment, Cambridgeshire Country Council
